Subject: Can you think of any other assessment/testing EPA did at Parcel G besides peanut spill & Bldg 364?
Attachments: 2001-4-27 Bldg 364 Peanut Spill Sandblast Grit.pdf

Dear Karla,

SF Examiner asked:

Q4: What previous assessment/testing has the U.S. EPA conducted at Parcel G?

Thanks for reminding me re Steve Dean. SO I drafted this below based on the attached. Can you think of anything else? I also did a search within the RACR for "Dean" but nothing turned up.

An EPA health physicist conducted independent scans in Parcel G. For example, he scanned by hand inside and outside Building 364 and confirmed that the former building site was clean. He also scanned a spill behind that building. Attached is a report for details.
